## AGELOC SCIENCE BRINGS REMARKABLE RESULTS

ageLOC science is unique in that it focuses on fighting the ultimate sources of aging to restore skin to a more youthful, radiant appearance.

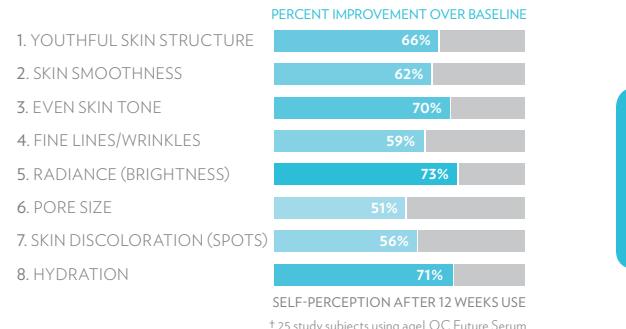

Nu Skin, in collaboration with anti-aging and genetics experts, has identified functional groups of genes, which we call Youth Gene Clusters (YGCs), that can influence how we appear to age. By identifying and understanding how these YGCs change with age, Nu Skin's proprietary ageLOC science can reset them to more youthful patterns of activity for younger, healthier looking skin now and in the future.

"I just posted a few photos on facebook and a friend told me, 'You look a lot prettier than 10 years ago.' So that is a great compliment."
