What are bioadaptive botanicals?

Bioadaptive botanicals are plants that thrive in extreme climates thanks to their adaptive properties. These special properties increase the plant's resilience and helps them—and your skin—recover from all kinds of damage and stress.

Is there anyone who should not use Exfoliant Scrub?

People who have moderate to severe acne should not use a physical exfoliation product like Exfoliant Scrub.

How does Exfoliant Scrub exfoliate the skin?

Exfoliant Scrub contains diatoms that are derived from marine phytoplankton. These are extremely fine exfoliators. Unlike other scrubbing agents, diatoms give under pressure and exfoliate without scratching the skin's surface.
