

NU SKIN 180°[®] CELL RENEWAL FLUID

Your skin is telling you it's time to make a change. Decide today to look younger with Nu Skin 180° Anti-Aging Skin Therapy System. This four-step skin care system is clinically proven to refine texture, even skin tone, and diminish the appearance of fine lines and wrinkles for an overall more youthful appearance.

MEET NU SKIN 180° CELL RENEWAL FLUID

Reverse the years—without irritation. Featuring a powerful 15 percent concentration of the polyhydroxy acid (PHA) gluconolactone, Nu Skin 180° Cell Renewal Fluid gently but effectively accelerates the cell turnover process, provides antioxidant protection, and enhances skin hydration to smooth texture and diminish the appearance of lines and wrinkles. Soy isoflavones lend support by providing antioxidant protection that limits the break down of skin proteins.

WHY YOU'LL LOVE IT

- Promotes healthy exfoliation, accelerating skin cell turnover for a vibrant, more youthful complexion.
- Helps diminish the appearance of fine lines and wrinkles and improve skin firmness.
- Limits the degradation of the skin's structural proteins.
- Smooths skin texture and diminishes pore size.
- Enhances stratum corneum barrier function, increasing the skin's resistance to chemical change and environmental stress.

WHAT POWERS IT

- **Gluconolactone**—gentle enough for all skin types, this polyhydroxy acid (PHA) increases skin cell turnover, diminishing the appearance of lines and wrinkles and improving texture.
- **Soy Isoflavones**—promote skin firming and the smoothing of lines and wrinkles.

HOW TO USE IT

Use morning and night (after Skin Mist has dried) as the third step of Nu Skin 180° System. Fill dropper to the 0.5 ml indicator line and dispense into hand. Apply fluid evenly over entire face, avoiding the eye area.

MORNING REGIMEN

- STEP 1:** Face Wash
STEP 2: Skin Mist
STEP 3: Cell Renewal Fluid
STEP 4: UV Defense Hydrator

EVENING REGIMEN

- STEP 1:** Face Wash
STEP 2: Skin Mist
STEP 3: Cell Renewal Fluid
STEP 4: Night Complex

FYI

Young, healthy skin regularly sheds dead surface cells and replenishes them with newer, plumper cells from deeper layers of the skin. This process is called cell renewal. As individuals age, cell renewal begins to decline. This decrease causes the cells in the outer layer of the skin to become sticky and accumulate on the surface, leading to a dull, sallow complexion; a rough texture; and an increase in pore size. Polyhydroxy acids (PHAs) work by breaking down the extracellular matrix that holds cells together, which allows the dead cells to slough off. As the skin's surface is exfoliated, basal cells in the lowest layer of the epidermis are stimulated to speed up their rate of division, bringing younger, healthier cells to the surface. Smoother, firmer, and more radiant, these younger cells reveal a youthful complexion.

NU SKIN 180°[®] CELL RENEWAL FLUID

LEARN MORE ABOUT IT

How many times a day should I apply Nu Skin 180° Cell Renewal Fluid?

Nu Skin 180° Cell Renewal Fluid is designed to be applied twice daily after the Skin Mist dries. The 0.5 ml measurement line on the dropper indicates the amount to apply for each usage. If using in conjunction with AHA Facial Peel and Neutralizer, you should still apply Cell Renewal Fluid once a day—in the evening if applying AHA Facial Peel during the morning regimen or vice versa.

What are the differences between Tru Face® Revealing Gel and Nu Skin 180° Cell Renewal Fluid?

Both products contain polyhydroxy acids (PHAs) to enhance cell turnover. Each application of Tru Face Revealing Gel contains an eight percent concentration of PHAs, a combination of gluconolactone and lactobionic acid. Perfect for individuals looking for a targeted treatment, this formulation is designed to improve skin radiance, texture, and pore size. Nu Skin 180° Cell Renewal Fluid provides a 15 percent solution of the PHA gluconolactone as well as soy isoflavones in each application. This formulation is specifically designed to address overall skin aging and provides wrinkle diminishing benefits in addition to radiance, texture, and pore benefits. Nu Skin 180° Cell Renewal Fluid is perfect for individuals who want a comprehensive anti-aging system.

WHAT'S IN IT

Water (Aqua), Gluconolactone, Sodium Gluconate, Butylene Glycol, Arginine, Soy Isoflavones, Salicylic Acid, Tetrahydrodiferuloylmethane, Allantoin, Panthenol, Xanthan Gum, PEG/PPG-14/4 Dimethicone, Tetrasodium EDTA.
